

PROJECT STATUS	DEFINITION
IDENTIFIED	"Identified" means that a building or equipment related deficiency requiring significant investment and effort for its remediation has been observed and documented in CAMIS. An estimate of the cost of remedying this deficiency is generally part of the CAMIS record.
REQUESTED	The agency or "owner" of the facility with the observed deficiency has sought funding from DCAM and/or another authorized funding body for the execution of the identified project.
APPROVED	The project has been approved by all relevant authorities and funding has been allocated to the project.
PLANNING	This phase may include activities associated with the selection of designers, consultants and construction companies to perform the project. Contract development, including specification of scopes of services, and contract negotiations would also be included under this status. "Planning" status may include the design and/or study phases of approved projects, activities associated with development of project management procedures, and the development of construction management, scheduling, and acceptance procedures for the project.
ACTIVE	Work has commenced on the project and funds are being spend on project activities.
SUPERSEDED	The project has been replaced by or incorporated into another project.
CANCELED	The project has been canceled.
CLOSED	The project has been completed.
